

De Automatum Legis Chapter I - The Three

First campaign for the discord team.

Mountains

This epic is supposed to be a short one, built around five large dramas. It's about serving an innovative Master Engineer, helping him in his daily problems, etc...

At first, the players are hired by the engineer, and the only reason they have to do the job is that they are payed five time the standard amount. Of course, the man as recruited specialists in their domains, and sizing the talent of a person is something he is really good at.

To be sure the guys is provided the good people to hire, multiple avatars are pre-rolled to fit different roles. Either players can switch between characters in a fixed set from a session to one other with, or keep the dormant avatars in a big pool where everybody is welcome to tap if he doesn't want to play its main character, this is not an issue. Just a decision to be made with the agreement of the players.

In any case, it might be important that the main cast of characters might be present in the epic at least as NPCs, as they may be linked to the main intrigue.
