Chapter III - Lost World: Verona

History of Verona

In The Hands of House Masseri

The Masseri arrived on Verona from Grail in 2715 AD

The Ukar Fraud (3305 AD)

The ukar community present with the Masseri starts the *Shaduqai*, a mystic event supposed to append after the rebond of the ur ukar people with the annunaki.

Clockwork: Third World (3834 AD)

Named **Clockwork** at first, Verona was the third World of House Masseri.

Shelter from the Storm (3917 AD)

Perpetual Lock Down (4133 AD)

In 4133 AD, House Masseri decided to solve the Kurgan invasion menace with the more extreme decision, shutting down the gate forever.

Last fief of the House (4974 AD)

A group of imperial Masseri open the gate and reached Verona, the first newcomers since 4133 AD.

Ennemy at the Gate (4998 AD)

Assault (5000 AD)

Kurgans manage to go through the gate once more thanks to the treason of **Giacomo Kellerman***. They are led by the mighty **Taashik Al Kalibann***.

Breaking the cog (5004 AD)

In 5004 AD, an incident happened on Verona terraforming engine. The failure caused all water to be removed from the low atmosphere, creating in the same move the deep thick steam cloak that now surrounds **Verona** and make it look like a tiny gas giant from a distance.

The current situation

For six monthes, since the arrival of the last message from **Arno Sforza**, the **Sons of Sathra** and more generally the whole house Masseri have been waiting for the coming of the *imperiali*.

Tricks in the Adventure

- The opportunity to gain knowledge of some of the secrets of the Sons of Sathra (Void Sensitivity).

3.1.2 Sacred Moon

Sanctuary to all offworld refugees

House Masseri holds **Rotunda**, the first moon of *Penthac* the fifth planet of the Verona System as a refugees colony. It has been established centuries ago and is fully operational. It is here that all operation on the jumpgate are done, by a special mystical/religious order called the Navigators.

Old Acquaintances

Here, among the tunnels, the party will met an old friend, **Ravi Lobahura** who has decided to come help the community.

Landscape

Primo Rotunda is essentially an underground facility transformed into a giant shelter. With time, it has started to look like a refugee camp with more and more improvised solution to everyday problems transformed into permanent resources. A lot of underground culture is done in the alleys of Primo.

3.1.3 The Fall

Test trip

From space, Verona appears as a gas giant. A test drive will be planed to see the capabilities of **[clarisse was not found]** on such a high profile approach.

Reaching the Ground

This operation is a really tough one, and can only be done only by the best pilots.

- The Hellcloud (20% of the trip), the higher layer of the atmosphere can disable all systems at any time if the ships goes through a node (electro magnetical node, source of terrible lightning bolts). A navigation check is needed every hour at **DV 24** to avoid one, and it takes **five hours** to go through this layer the **safe way**. An attempt can be made if **going straight** is an option, it takes only **one hour** but **3 checks** must be made at **DV 26**.

A failed check will damage the ship like a **standard medium blaster** gun shot.

- With winds reaching 500 km/h in the middle layer, the Purgatory, (between 20% and 70% of the trip), manoeuvre checks are needed every 30 minutes to avoid drifting to a solid obstacle (can be liquid water/hailstorm or a solid body part of the rings of Verona). The moons of Verona are actually at the 30%, 45% and 69% of the atmosphere. Two are obstacle that should be avoided and solid bodies that create gravity wells also, but the biggest at 69% can be detected from the Hellcloud and could have a slingshot effect if its gravity well is crossed from too close.
- The upper layer (70% to 71%) is liquid water. If not handled correctly it can be a terrible impact at contact.

The best way to reach the ground of Verona is by using an escape pod. House Masseri has a few that had been modified to handle the length of the trip.

3.2 Not a drill

The conclusions from the flight test should be obvious: it takes an ace to bring a lander down the ground. More than this, it can be really hazardous to find a place to land properly due to the global ground condition.

3.3.1 Kurgan Recon Team

Open Battle

A patrol will soon be send when close to point 0, in a radius of 150 km. This patrol is a squadron of six Sharadiq Manned Battle Drones and three *Maruk AntiGrav shuttles*. Each Maruk as a crew of one pilot, one communication/navigator specialist and four Baratur Marines. The kurgan troopers are 95% male, in contrast with 70% women filling the ranks of the Resistance.
